Atkins, David C / Physical Science Documents and Powerpoints

Physical properties are characteristics that can be observed without changing the identity of a substance. A chemical change results in the formation of a new substance. A physical change alters a substance's physical properties but not the identity of the substance. SUMMARIZE IT Identify six examples ofphysical properties of matter.

Active Reading Note-taking Guide Science Grade 8

Teach middle schoolers good note-taking practices by modeling a T-chart. Start by identifying the title of the article and adding it to the chart after the "T =" symbol. Then, read the next two sentences and zero in on a specific idea from the passage (in this case, one idea would be climate extremes).
